### INSTALLATION INSTRUCTIONS

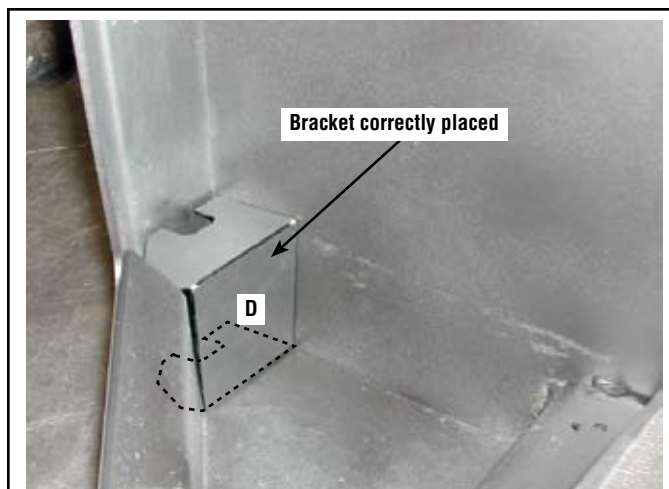

- Step 1.** Remove the two log support brackets (D) from the box and bend the ends of the brackets 90 degrees at the bend lines. See **Figures 2 and 3.**

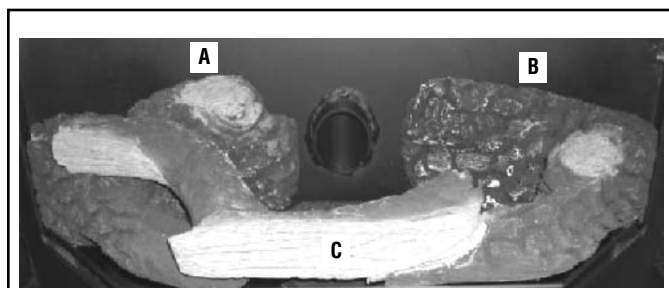

**Step 2.** One bracket goes into the left corner and the other into the right corner of the firebox. Rotate the brackets (D) so they are placed as shown in **Figure 3**. The bracket fits between the back of the firebox and the air wash at the front of the stove.

**Step 3.** Remove the ceramic logs from the box and carefully unwrap them. Position each back log (A and B in **Figure 4**) in their proper place, one on each side against the back of the firebox.

**Step 4.** The front log should face the front of the firebox with the wood grain showing. It should rest on the other two back logs. See **Figure 4** for assembled log set.
